

JUMP-START YOUR RECOVERY WITH H-WAVE®.

Chronic injuries can ruin your life, making you give up work and all the pastimes you love. Prescription medications may temporarily relieve the pain, but they can also be dangerous, and even the most potent painkillers can't rehabilitate your injury or restore your function and range of motion.

But H-Wave can.

H-Wave is a unique, scientifically proven method for relieving pain and providing rehabilitative benefits. Even if you've used electrical stim before, H-Wave is different. While TENS can temporarily mask pain, the relief doesn't last. Every time you H-Wave, you're getting therapy for your injury.

H-Wave's pads apply comfortably and easily to let you target the pain.

ARE YOU READY TO TRY H-WAVE®?

Proven effective in reducing pain and speeding recovery, H-Wave is used to:

- + Treat chronic, acute, traumatic and post-operative pain
- + Increase circulation
- + Relieve muscle spasms
- + Increase range of motion
- + Prevent muscle atrophy
- + H-Wave may also be prescribed after certain surgeries, including spinal surgery, rotator cuff reconstruction, and many others

If your insurance doesn't fully cover H-Wave, there are affordable options to fit your budget:

- + Monthly payment programs
- + Rent-to-own options
- + Lifetime care (fixed price) programs

30-Day Risk Free Guarantee:

Doctors trust H-Wave so much, they've prescribed it to millions of patients in clinics and hundreds of thousands for in-home use. H-Wave helped these patients get back to pain-free living. If your doctor recommends H-Wave and you're not convinced after a month of use, just return the equipment and 100% of the charges will be refunded to you or your insurance carrier.

INFORMATION FOR PATIENTS

THE VERY BEST IN DRUG FREE PAIN RELIEF & RECOVERY

Get back to your life with Home H-Wave

THE SCIENCE BEHIND H-WAVE®.

The H-Wave generates a mild current that produces a comfortable, non-fatiguing muscle contraction. These contractions promote creation of new blood vessels that take necessary nutrients to the injured part of your body and help dispose of the “waste materials” that can keep you feeling sore, tight, and hurting. You’re not only getting pain relief, you’re rehabilitating your injury, too.

Mode 1: Active Rehabilitation to Unblock the Pathway to Recovery

This low-frequency mode contracts muscle fibers to promote blood flow, lymphatic circulation, and tissue rehabilitation for accelerated recovery.

Mode 2: Breaking the Chronic Pain Cycle

This high-frequency mode is designed to manage pain by shutting down your pain signals to provide lasting pain relief. The pain relief is so effective and immediate that H-Wave is FDA-cleared for use as dental anesthesia.

When other treatments only provide limited relief, H-Wave fast-forwards your recovery.

- + Natural, non-addictive pain relief
- + Improves range of motion
- + Restores function
- + No downtime
- + Use it in the comfort and privacy of your own home
- + Treatments are comfortable and relaxing

FOR MORE THAN 30 YEARS, TOP ATHLETES AND COACHES HAVE TRUSTED H-WAVE®.

H-Wave has been used by hundreds of thousands of patients to relieve pain and speed recovery from an injury. Multiple articles have been published in scientific journals that prove the effectiveness of H-Wave stimulation. That’s why clinicians from more than 70 professional sports teams use H-Wave to treat their injured players.

H-Wave is so effective and reliable that many professional athletes, teams, and trainers depend on our therapy to manage pain and maintain muscle health.

Athletes, everyday people, and top doctors praise H-Wave.

We have been utilizing the H-Wave over the past five years, and have had outstanding success...We have had excellent results in both acute and chronic type injuries...

*Jim McCrossin, MS, ATC, CSCS
Head Athletic Trainer and Strength and Conditioning Coach, Philadelphia Flyers*

The H-Wave Home Unit is easy to use, very effective and my patients and athletes love it. I am especially impressed by the fact that it often helps to reduce the need for medication and speeds recovery.

*Nicholas DiNubile, MD.
World Renowned Orthopaedic Surgeon and Best Selling Author*

With H-Wave, I have been able to do things I have not been able to do for over 2 decades!! Without the constant pain, my outlook on life has significantly improved.

Lineville, IA*

H-WAVE® YOUR WAY TO LESS PAIN AND A FASTER RECOVERY.

Getting started with H-Wave is easy. Our units are available for home use, and we’ll even come out to train you and help create a customized treatment plan to help you achieve great results.

Step 1: The Prescription

If your doctor determines that electrotherapy is right for you, he or she will write an order for an H-Wave device. We take it from there, handling all paperwork and insurance authorizations.

Step 2: Customized Treatment and Support

An H-Wave consultant will meet with you to create a personalized plan and make sure you are comfortable using the system.

Step Three: The Results

Most users report reduced pain, functional improvements, and reduced need for pain medication.
